Welcome,

Welcome to North Central Missouri & to the Missouri Red Angus Associations Inaugural Show-Me Red Fall Sale! Over the past summer, the MORAA board of directors elected to sponsor a fall sale in the Northern part of the state. We felt sponsoring this event would provide MORAA members with additional marketing opportunities and allow our members to expand their footprint throughout the state in an effort to meet the growing demand for quality Red Angus genetics.

Red Angus continues to lead the industry as cattlemen demand quality genetics with strong maternal traits. That is why the Red Angus/ Red Angus influenced females continue to be the most sought-after female in the beef industry today. You ask why? It's all about the cow & the "ility"

- Motherability
- Fertility
- Docility
- Stayability

The MORAA recently rolled out a program to identify fescue based Red Angus animals when they announced their Fescue Belt Certification Program. We did so in an effort to identify animals that were born, bred & raised on Missouri fescue. Missourians have built their herds using genetics that have proven to be "fescue tolerant" livestock. In 2020, the Board of Directors elected to expand the program to include animals from the entire fescue belt region of the United States. As you browse the catalog, you'll find these animals identified as such.

We are confident that our members are offering you some of the top Red Angus genetics available today. Whether you are looking for a fancy little show heifer, females to start or expand your registered herd or a top set of commercial females, make plans to attend this great event. The cattle will be in place & available for viewing early Friday afternoon. Whether you intend to bid, buy or just come visit, we truly look forward to seeing you on sale day. If you are unable to attend, don't hesitate to contact any of the owners or buyer representatives listed in this catalog. Additionally, the sale will be broadcast live over the internet through DV Auction.

Regards,

Dan Lacy

MORAA President

Terms

All purchases are expected to be paid in full at the conclusion of the auction. If buying online or via a phone bid you MUST SEND A CHECK OR WIRE funds to Kirksville Livestock by the following Tuesday. If you are representing another party, you must pay with cash or check at the conclusion of the auction.

Kirksville Livestock

PO Box 242 | Kirksville, MO 63501

Office: Patty Foster: 660-665-9804 Fax: 660-665-0741

Email: kirklivestock@marktwain.net

Purchaser's Risk

All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

Bidding

Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

Certificate of Registry

A certificate of registry for cattle will be transferred to buyer.

Announcements

Any errors or changes in information contained in the catalog will be announced from the block and such announcements shall take precedence over the information contained herein.

Health

All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold.

Breeding Guarantee

All animals are guaranteed by the seller as outlined in the Red Angus Association of America code of ethical sale practices.

Liabilities

All persons who attend the sale do so at their own risk. The seller, auction facility, and sale manager assume no liability for any accidents that may occur. Neither does the seller, auction facility or sale manager assume liability for the loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or act of god. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and the seller. They are not responsible in any way for the failure on the part of the buyer and the seller to live up to their obligations or for the truth of any warranties or representation, express or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action must be between the buyer and the seller. This catalog has been prepared by the sale manager from pedigrees and information supplied by sources deemed reliable, however, the sale manager will in no way guarantee the pedigree, percentages of the animals selling, or data included in this catalog. Any exceptions taken are between the buyer and the seller.

Contract

The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

Special Thanks to

RITCHEY TAGS FOR THEIR SUPPORT

BELOW YOU WILL FIND DESCRIPTIONS OF THE EPD DATA LISTED IN THIS SALE CATALOG.

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

INDEX MEASUREMENTS

HerdBuilder (HB), Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions. This Index focuses on Stayability, Heifer Pregnancy and Calving Ease but also factors in carcass based traits and growth indicators.

GridMaster (GM), Use the GridMaster Index if your primary goal is maximizing profitability of feeders in the feedyard and on the rail. Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

CARCASS

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Yield Grade (YG) predicts differences in USDA Yield Grade score and is expressed in USDA Yield Grade units.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Red Angus' Stayability (STAY) EPD is a selection tool to improve overall cowherd efficiency through reducing replacement rate. Cows that stay productive, are problem free and last longer mean a larger percentage of heifers can be cash cropped, instead of developed as replacements. STAY predicts the probability of a bull's daughters remaining productive until at least six years of age.

Heifer Pregnancy (HPG) predicts the probability of heifers conceiving to calve at two years of age.

Maintenance Energy (ME) predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month.

Missouri Red Angus Association Fescue Belt Certified Program Announced

The Missouri Red Angus Associations Board of Directors recently approved the “Missouri Red Angus Association Fescue Belt Certified” program as an initiative designed to promote Missouri Red Angus members genetics.

Official MORAA Fescue
Belt Certification Logo

Many of us who live in the “fescue belt” have experienced the problems associated with importing newly purchased cattle into our environment. What we’ve seen is a significant percentage of cattle that have not been raised on fescue struggle to perform after being imported onto this “grass we love to hate”. Some animals eventually overcome this issue, but many will not and will eventually be culled from the herd.

Fescue toxicity results from toxins called ergot alkaloids, which are produced by a fungus called endophyte that grows within the fescue plant. Cattle experiencing fescue toxicosis may exhibit rough hair coats, heat stress, suppressed appetite, poor growth rates, reduced reproductive performance, and in some cases lost tail switches or even hooves. The decreased animal performance seen during the “summer slump” of cool-season pastures is made even worse by these toxic effects of fescue.

Research on the subject of fescue management has been done for years. Several strategies can be used to mitigate the toxic effects of fescue, including removal or suppression of seedheads, overseeding of pastures with legumes or other forages, and good mineral supplementation programs. However, fescue remains a serious challenge. The USDA estimates fescue toxicosis costs the U.S. beef industry an estimated \$600 million to \$1 billion annually in lost revenue because of reduced reproductive and growth rates in cattle herds.

Missouri beef producers recognize the value of selecting cattle that are adapted to fescue. In 2016, University of Missouri Extension Geneticist, Dr. Jared Decker, was awarded a \$3 million grant from the USDA to evaluate genetic differences in cattle among regions. Decker and his colleagues are utilizing DNA markers to study the interactions between cattle DNA and the environment. The study is focused on DNA, hair shedding, and tall fescue forage. When complete, the data will be used to design region-specific EPDs.

The entire state of Missouri is situated within the fescue belt. Since fescue was introduced into our region, Missourians have built their herds retaining only genetics that have proven to be “fescue tolerant.” When looking for Red Angus genetics, look for the MORAA FBC logo & cattle that have **“Bred-in Fescue Tolerance.”**

This heifer has been halter broke and is coming along nicely. Very gentle personality. Danica has a way with breaking calves to be gentle. Her mom was a show heifer and she is following in her footsteps with her disposition. She is a Regency (RAAA#3791383) daughter out of a great Lacy/Heritage cow. She will make a great cow for your herd or show heifer if you want to take her that direction. She has lots of size to her. Doesn't seem to be bothered by much of anything.

This beautiful colored Charolais composite/percentage Red Angus will add just a little color to your herd. She can be double registered. She is out of a Charolais first calf heifer Cruter Big Creek Reba 803 (AICA #F1252361) and a Regency daughter (RAA#3791383). She will be a big and powerful female. Danica has halter broke this girl and she is coming along nicely. She is ready to find a great home either in the pasture or show road. This heifer has a bright future ahead of her.

Susan and I purchased the dam of Ariel 10H from Danica Lowrey in the 2019 Spring Sale. She didn't disappoint us as she raised a beautiful motley faced heifer out of our go to heifer bull, Copperhead 7172x. We have numerous Copperhead sired cows in our herd, and they possess tremendous udders and feet, a warm disposition, and produce healthy, highly marketable offspring. We believe she will be a very profitable, fertile female and raise excellent calves. Other genetics in her pedigree include Lacy Gold Bar 1120, Lacy Lakota 135 445, Mission Statement P27 and Red Soo Line Contender. 98.4% AR and 1.6% HP.

Deep, broody, and impeccable leg and foot structure. This heifer is hard to sell, but sometimes the good ones have to go. Check out her EPD's. This heifer will flat out perform and I expect her calves to push down the scales at weaning. Her dam, TRCC Marie 36B is also in my sale offering. Easy to handle. Conceived, born and raised on fescue.

If there had been an open show at the Missouri State Fair this year, you would have seen this beautiful heifer there! A sweetheart of a heifer with a dark red color. I ask myself why I'm selling her, but I wanted to put a really, good heifer in this first fall sale. Don't let the fact I didn't get a good picture of her cause you to over-look this one. We have been very happy with the calves from Red Blair's Signature 6D (#3920481), and this heifer is no exception! Sells open.

Don't miss this Deep End daughter from one of Twin Willows top Donors the A153 cow, out of a full sister to Mulberry. Check the out her EPD's for growth and carcass, marbling in the top 1%. Pasture exposed 5/15 to 6/30 safe to TW Bulls Eye 715E, reg.3865543.

LOT 26 - DAL PRAISE ROYAL 003G

Dal Praise Royal 003G would be an excellent addition to your farm. This girl was Danica's first bred and owned heifer, completely broke and trained all by herself. This heifer was ai'd on 5-19-20 to Sooline Power Eye 161x (reg #1406779) as a calf she won her class at NAJRAE in 2019. She also won her division at OEF and MSF. She didn't travel much in 2020 with everything being canceled but was Reserve Supreme Heifer at Cedar County Fair. She has lived her show life and is ready to make a great cow. With her genetics (Cruel Girl granddaughter and a Regency daughter) and the genetics Power Eye brings she is ready to have a top of the line calf you do not want to miss out on. *This heifer was ai'd on 5-19-20 to Soo Line Power Eye 161x (reg #1406779)*

LOT 27 - BACH MS CHINOOK 9020G

Wow! Here's a JEFFRIES MS CHINOOK Y929 granddaughter that is simply one of the best yearling heifers we've ever produced. She is a big, broody female who has depth in her chest floor, level throughout, and square from hooks to pins giving you that show quality appearance. She is structurally correct from the ground up and visually attractive. Check out her off-the-chart performance parameters. 72% of her EPDs are in the Top 27% of the breed, including a Top 5% Herdbuilder Index and a Top 1% Gridmaster Index. She scans an enormous 7% Adjusted IMF with a ratio of 127 along with an 11 in. _ ribeye area (115-ratio). Calving ease combined with growth--top 5% WW, 2% YW, and 1% ADG EPD. This heifer is going to have an IMPACT on your herd! We are selling 50% genetic interest rights & 50/50 on flushes and natural progeny she produces. We plan to maintain possession at Bachman Cattle Farms. *Confirmed AI bred to 9 Mile One-of-a-Kind 6129, with the calf due on March 15, 2021.*

MARTIN'S EVALU 071G (4095002) is a 1A heifer and daughter from the legendary C-BAR EVOLUTION 107Y. She hails from genetic lines of Pelton, C-BAR, Diamante, and Mushrush. Her dam was Champion Red Angus Heifer at the Arizona National Livestock Show in 2015. She is bred to TW GQ MAN 767E (3906519), who is the son of two time Denver National Stock Show Champion Red Angus bull Six Mile Taurus 519A and Keifers Lulu Y55. This calf, due late December or early January will have champion genetics on every side. Evalu is halter broke and will make a great addition to any herd. Bred to TW GQ MAN 767E (3906519)

Another young cow from the Bloxy cow family whose only fault is being bred for spring calving as we move to all fall-calving. Check out her fantastic BW to YW spread, as well as her ME EPD of -9! And, she weaned at 701#! We currently have her yearling bull calf in our bull pen. She is bred to Red Blair's Signature 6D (#3920481). Exposed May 1 - September 15.

We purchased this extremely easy-fleshing daughter of RED LAZY MC CC DETOUR 2W (1352939) in the 2014 Wildcat Creek Ranch sale as a bred heifer. She has always been a favorite, and is only being offered for sale as we have dedicated our program to an all fall-calving herd. She has a daughter that is in the Jones Red Angus herd in CO. She is bred to Red Blair's Signature 6D (#3920481) with exposure dates of May 1 - September 15. Was called 70 days bred on August 19.

The best way to describe 616 is Cow Power. This female is wide topped, bold-bodied, and big hiped. Her udder matches the characteristic quality of the Mulberry daughters, being wide, tight, with small, evenly-spaced teats. Her progeny offer performance and eye appeal. 616's maternal sisters averaged \$7,000 in the Brown dispersal. She was bred AI 4/26/20 to RREDS Pathfinder (R: 3952885), pasture exposed to Bieber Let's Roll G336 (R: 4140268) from 5/1/20 to present.

Here's a chance at a great Fritz Justice 8013 (1255322) Daughter. The vet called her due late November but there's a chance she could have a calf at side by sale time. The calf's sire is our jointly owned PIE One of a Kind 842 (4047190). We are weaning his first calf crop now and they are impressive. I'm betting DY1439's calf will impress you from the day its born all the way to weaning. Due to calve late November.

We are offering a select few of our fall calving cows that are just a little late for our calving season goal. RGRS Sunflower is a moderate framed deep bodied Fritz Justice 8013 (1255322) daughter that goes back to the famed Nebula P707 on her dam's side. She has a very exceptional set of EPD'S and what is most exciting about this offering is she is pasture exposed to JSWO Stockman F101 #4075788 (semen selling in this sale) this calf will have calving ease and growth with great carcass data as well. Calf due date is November 25 but could come early!

Genna exhibited 725 at the 2017 NAJRAE where she received Reserve Division Champion as a calf. Her quality starts at the ground with an excellent foot shape and complementary build. She's progressed into a deep sided, big footed, brood cow. We love her for her feminine quality and characteristic Kodiak udder. You'll note the apple does not fall far from the tree when you appraise her fancy April heifer calf, with show ring potential. 725 was pasture exposed to Bieber Let's Roll G336 (R: 4140268) from 5/27/20 to present, observed bred 6/10/20, due 3/15/21.

LOT 46A: VanWye Split Rock 019 is out of VanWye Peacemaker 7025 (R:3805386).

Marie is a super broody cow that has a fabulous heifer calf (CR Melanias Mission - 4301095) at side sired by Mission Statement (960383). This cow is a great momma cow and is easy to handle. Her heifer calf is an eye catching fancy heifer that has her whole life to impress. This cow will sell as not exposed and is ready to breed to the bull of your choice! Do not miss out on this fancy solid pair. This cow has been on fescue the last several years and has had no issues.

This bull has been a stand out from day 1. He is long, deep bodied and has great leg and foot structure. He was just 67 pounds at birth and yet really pushed down the scales for a 1500 pound yearling weight. To get ready for breeding season he has been on a high roughage and low grain ration. Turn this easy to handle bull out and sleep during calving season! Conceived, born and raised on fescue!"

MARTIN'S JULIAN AR02 is a linebacker. He is thick, capacious, with great feet and very docile. AR02 hails from an elite cow with remarkable EPDs out of the RA Brown Ranch sale (3522689). His sire is a leading calving ease headliner for ABS, REDHILL B571 JULIAN 1W (1308289). You will be challenged to find a bull with a better combination of phenotype and genotype than MARTIN'S JULIAN AR02! He is on test at Green Springs Bull Test and his numbers will be available at the sale. When you see him and look at his genetic package, you will know he is the total bull.

Banshee 207G is ready to go to work for you while offering some of the breed's most notable genetics that can take your herd to the next level. An ET calf from one of our Mulberry/Cherok donors is well-balanced in terms of phenotype and EPD'S and weaned at over 700lbs! He is sired by none other than SOO LINE POWER EYE 161x--the \$76,000 bull from the 2015 Mile High Classic and the most famous son of Red Cockburn Ribeye 308U. Power Eye has produced numerous high sellers, herd sires, and show winning progeny the likes of Damar Trump C512 & KJHT Power Take Off (PTO) to name a few. He produces stout, high performing cattle with an abundance of quality and power and when you combine that with 207G's maternal influence that includes renowned female-maker Mulberry 26P and the infamous Cherok 22L cow family, you've got a winning combination for building a herd that will stand the test of time.

Sired by the popular Genex sire Domain, 9016 is smooth fronted, level topped, and deep ribbed. This masculine, big footed bull is wide based and expressively muscled. He is outstanding in phenotype and genotype. His EPDs rank him in the top 20% of the breed for CED, YW, Milk, ADG, Marb and REA. His Bieber Hard Drive Y120 sired dam won both her January heifer calf class at the 2015 National Red Angus Junior show at Louisville and the Land of Lincoln class at the 2016 NAJRAE. We used him as the cleanup bull for our yearling heifers this past summer. He will be semen and trich tested prior to the sale.

This bull represents Bachman Cattle Farms breeding at its finest. He's extremely eye-appealing with structural correctness in abundance. Moderately framed, yet he travels so smooth and glides his way around the pasture. He's been our "go-to" heifer bull, but with growth, maternal and carcass traits galore. He's qualified as a heifer bull with his progeny hitting the ground with an actual 67 lb. birthweight average, yet supports Top 19 - 21% Growth EPDs. Stack all that on top of his Top 6% Herdbuilder Index, meaning you'll want to keep females to build your herd around. With a Gridmaster Index in the Top 23% range, you can see why he qualifies as a Top \$ Angus bull as well. CRACKERJACK = COMPLETE! Selling 50% Genetic Interest rights plus split pasture walking rights - 1st pasture rights available for spring of 2021, then negotiated after that. Check out this bull's DAM in this sale - RAB 184B.

LOTS
68 - 79

12 COMMERICAL
FALL OPEN HEIFERS

Offered by: HENKE FAMILY RED ANGUS

Open fall born (September 6-16) heifers out of commercial Red Angus cows that were time AI'd to Lacy 1776 002D (5L Independence x Lacy Legacy 6097). We have been exclusively using Red Angus sires both naturally and with AI for the last 12 years. We started using Lacy bred sires in the last 5 years and like the growth and fescue adaptability that those sires have brought. These heifers have been born and grazed on fescue and wintered on fescue hay. Currently they are grazing fescue pasture and will be supplemented with corn before the sale. All have passed a breeding soundness exam, been wormed with Synanthic, poured with Standguard, and vaccinated with Express FP and Ultrabac 5- VL on 8-16-20. Will sell in 4 groups of 3 - A, B, C, D.

LOTS
80 - 87

8 COMMERICAL
OPEN HEIFERS

Offered by: ROGERS RANCH

Offering 8 commercial heifers right out of our replacement group. These ladies have been grown on fescue pasture and about 2 lbs of grain a day since weaning just to keep them bucket broke. These females are either straight red angus or a few will have some Simmental influence on the dam's side. Birth dates range from 9-2-19 to 10-24-19. The heifers have been synchronized using a 14-day CIDR protocol. If the buyer so chooses we will take these heifers home and AI them for an extra \$100 over the sale price. They can be picked up the week of AI or we can turn out with our cleanup bull for 45 days for an extra \$150. We are offering 10 straws of PIE ONE OF A KIND 842 RAAA # (4047190) with these 8 heifers! Will sell in 2 groups of 4 - A, B.

Sire Reg: 3525359 - Dam Reg: 1645737

The potential for this mating is beyond exciting. Mann Red Box 55c is currently one of the most phenotypically correct and talked about Red Angus bulls in the breed. Duff Cattle Company offered 25 packages of 10 units of semen for Red Box and it demanded an average of \$303/straw on 250 units. Red Box truly possesses a "Wow" factor as does Annie XT 3279A. They both possess many traits that are hard to find in one package including body volume, fleshing ability, soundness, foot structure, and style. The dam of Annie XT 3279A is Red Soo Line Annie 7249, one of the most decorated females in the red angus breed, including being named the World Angus Forum's Reserve Grand Champion Female. Annie XT 3279A is very special and resembles her dam in many ways. Her elegant presence, three dimensional rib shape, frame size, and squareness of hip is truly unique. This mating is absolutely loaded with stellar genetics. An incredible opportunity, buy with confidence. Embryos will be held at ReproLogix in Kansas. 3 embryos with a guarantee of one pregnancy completed by a certified technician.

SIX MILE SIGNATURE 295B - LOT 104 SEMEN

Here is your opportunity to inject some "World Class" genetics in your program. Both bulls are the result of brilliant breeding and possess a powerful look resulting from their dominant and proven ancestors. They are a combination of the best phenotype and genotype available in the industry today. If you are looking at producing offspring capable of winning championships in the show ring, or producing high quality powerful and functional cattle to work in the pasture, here's a tremendous opportunity. Semen is located at Show-Me Genetics in Strafford, Missouri.

3J One of a Kind A228æ was the high selling bull in the 2015 Red Alliance Sale in Shawnee, Oklahoma. A son of BUF CRK The Right Kind U199 that is a smooth, easy-fleshing, free-moving, slickhaired, fescue-tolerant bull. While his sons are quite good, he produces incredibly functional daughters with super udders, extended spine structure and length of body and extremely good feet and leg composition. In the cattle business there is nothing more important than longevity and fertility in your cow herd, his dam—the \$40,000 Badlands Cedar 922 cow is one of the most famous and productive females in the breed. At the age of 15 she had a natural calf and is a top donor cow averaging 12 eggs per flush.æ If you have moderate or medium framed cows, he will add that growth explosion with added length and stature with exceptional style and correctness. Semen will be shipped from Show-Me Genetics, Strafford, MO at buyers expense.æ

While JSWO Stockman F101 is an outstanding individual to look at and analyze with great muscle expression, structural correctness and outstanding feet. We encourage you to look at his extended pedigree which contains some of the breeds leading proven bulls and females from Pieper, Bieber and Andras herds. Combine all that with a very impressive EPD profile and we think he will make a great impact on any herd. Here is a picture of him in his working clothes and a picture of his Andras Fusion x Bieber Tilly Dam. Selling 10 units semen Stored at the ranch. Buyer pays shipping cost or picks up at the ranch."

Why “Missouri” Red Angus?

Many of us have experienced the problems that can be associated with importing newly purchased cattle into our “Fescue” environment. What we’ve seen is a significant percentage of cattle that have not been raised on fescue will struggle once imported into the fescue belt & forced to perform in our environment,.....”on the grass we love to hate”. Fescue toxicity often referred to as “Summer Slump”. Cattle experiencing fescue toxicosis may exhibit rough hair coats, heat stress, suppressed appetite, poor growth and reduced calving rates. Some animals eventually overcome this issue but many will not and will eventually be culled from the herd.

While there are several tools offered to combat the problems such as mineral supplements, DNA testing, etc., their success rate has limited at best. The USDA estimates Fescue toxicosis costs the U.S. beef industry an estimated \$600 million to \$1 billion annually in lost revenue because of reduced reproductive and growth rates in cattle herds.

Research on the subject has been done for years & in 2016, University of Missouri Extension geneticist, Dr. Jared Decker won a \$2 million grant from the USDA to find genetic differences among regions. Decker & his colleagues are utilizing DNA markers to study the interactions between cattle DNA & the environment. The study is focused on DNA, hair shedding & tall fescue forage. When complete, the data will be used to design region-specific EPD's.

The entire state of Missouri is situated within the fescue belt and since fescue was introduced into our region, Missourians have built their herds using genetics that have **proven** to be “fescue tolerant” livestock. This is one of the great advantages that the vast majority of our members have over breeders from outside the fescue belt..... **”Bred In Fescue Tolerance”**
